Everything you need to know about body armor! When shopping for body armor, it's important to educate yourself on the pros and cons of different body armor materials and plate carrier options. At Spartan Armor Systems® we want you to get the body armor and gear that's right for you. That's why we've put together this collection of videos to make the topic of body armor much easier to understand and allow you to make your purchase with confidence. There are many facets to the subject of body armor, buying body armor is only the first step. To get the most out of your body armor and plate carrier it is critical to understand proper sizing, adjustments and use of features. This Body Armor 101 series is designed to build foundational knowledge and arm you with the information necessary to build a kit that is tailored to your individual needs. Please don't hesitate to contact us if you have any questions about our products.

# ABOUT

Spartan Armor Systems® manufactures the highest quality ceramic and steel core body armor in the industry. To ensure maximum ballistic integrity, all of our body armor is tested at NIJ accredited laboratories. Every piece of AR500 and AR550 steel is proudly manufactured here in the United States. From the steel mill to the end user, we utilize the most advanced tracking system in the industry resulting in a superior quality assurance process. We stand behind each piece of steel core armor with a 20 year shelf life warranty.

## PROCESS

Each piece of AR500 and AR550 steel is meticulously shot blasted to remove any impurities prior to coating. We go the extra mile by CNC Laser Cutting our body armor plates to ensure the cleanest, strongest edges in the industry.

## LAW ENFORCEMENT & GOVERNMENT

Our body armor has been rigorously tested in laboratory and real world environments. Spartan Armor Systems® body armor has been proven to save lives in the line of duty.

## DEALERS & OEM

Spartan Armor Systems® has an extensive dealer program that provides strong margins and priority service to our dealers. Our dedicated dealer portal website allows our dealers to quickly and efficiently submit orders 24 hours a day.

For questions regarding our dealer program or products, please email **info@spartanarmorsystems.com** or call **(520) 396-3335**.

For law enforcement & department orders, please email **LEO@spartanarmorsystems.com**

For OEM manufacturing and private labeling, please email **OEM@spartanarmorsystems.com**

# ***STEEL CORE***

## **BODY ARMOR**

Spartan Armor Systems® manufactures high quality steel core body armor that has been tested and proven by an independent NIJ certified laboratory. Each piece of steel is laser cut, cleaned and then properly stored to ensure maximum ballistic protection. Our proprietary Encapsaloc™ fragmentation mitigation coating significantly protects the operator against secondary injuries. Our steel core body armor is proudly manufactured in the U.S.A. utilizing the highest quality standards in the industry.

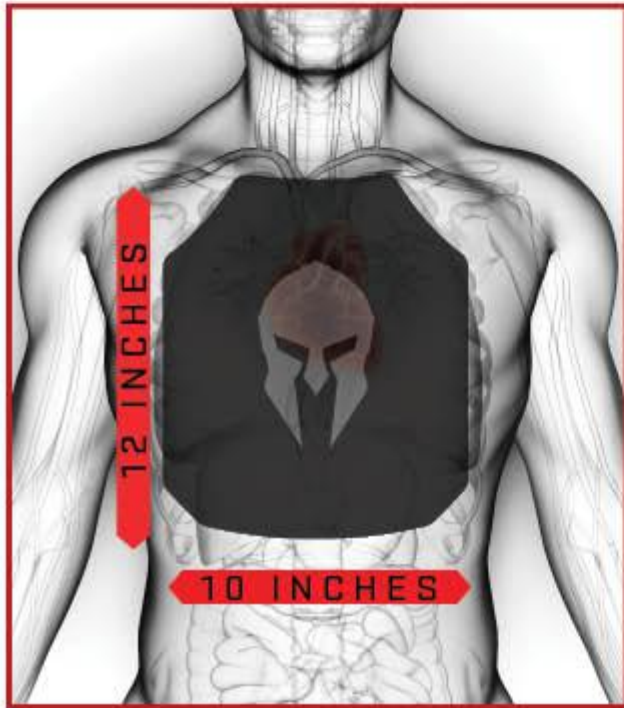

# ***SHOOTERS CUT***

## **VS**

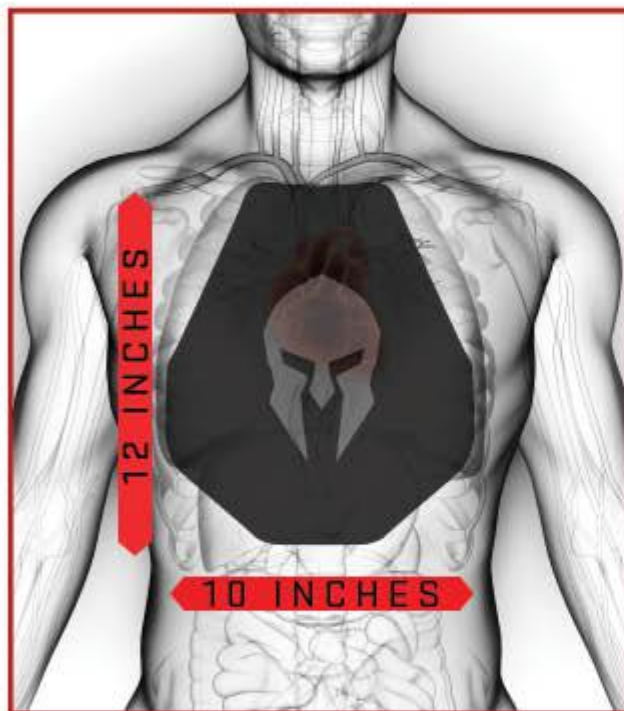

# ***SWIMMERS CUT***

To accommodate different body types and operational necessities, Spartan Armor Systems® designed two different "cuts" of steel core body armor: Shooters Cut and Swimmers Cut.

### **SHOOTERS CUT PLATE**

Our Shooters Cut steel core body armor plates offer the largest amount of coverage to help reduce the possibility of injury to vital organs. This style of plate is slightly cut at the shoulders to allow the operator to maintain an acceptable range of motion.

### **SWIMMERS CUT PLATE**

Swimmers Cut steel core body armor plates are designed to significantly increase range of motion in the shoulders and upper body. The reduced coverage in the shoulder area also results in a plate that is 2 lbs lighter on average compared to Shooters Cut plates. The trade-off is simply the reduced amount of coverage in the top and bottom corners of the plate.

# **ADVANCED TRIPLE CURVE™**

PROPRIETARY ERGONOMIC DESIGN

## **PROPRIETARY COMFORT TECHNOLOGY**

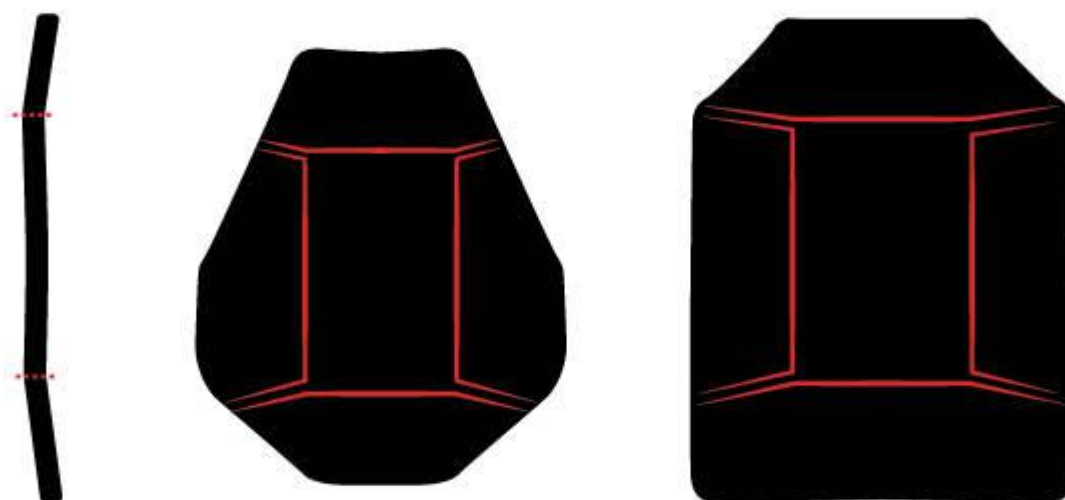

Flat and single curve plates can be uncomfortable, especially when worn for extended periods of time. Our proprietary Advanced Triple Curve™ (ATC) technology provides the operator with a far more comfortable fit. Each bend contours to the body, resulting in a more ergonomic plate, which is a great choice for extended duty applications. We offer ATC options for all our Spartan™ Omega™ AR500 and Spartan AR550 body armor plates. Each ATC plate is fabricated according to a patented method.

## **SIDE PROFILE COMPARISON**

### ***FLAT BODY ARMOR PLATE***

### ***ADVANCED TRIPLE CURVE™ ARMOR PLATE***

Each red line illustrates the bend used to achieve the ATC design. Each ATC plate is fabricated according to a patented technique.

# SPARTAN™ OMEGA™ AR500

## LEVEL III BODY ARMOR

Our Spartan™ Omega™ AR500 body armor is rated for level III ballistic threat protection under NIJ 0101.06 specifications. However, we utilized an independent NIJ certified laboratory to prove that Spartan™ Omega™ AR500 is capable of defeating higher velocity threats [aka Special Threat Testing]. Each Piece of armor is precision laser cut and available in a Shooters or Swimmers Cut design.

# SPARTAN AR550

LEVEL III+ BODY ARMOR

Spartan AR550 body armor provides proven ballistic protection against advanced threats, thus being given the level III+ designation. This armor has been NIJ certified to meet or exceed NIJ 0101.06 level III requirements for our single curve, full coat/Encapsaloc™ configurations. NIJ certification applies to both Shooters Cut and Swimmers Cut plates. Spartan AR550 is a top choice amongst Law Enforcement and Security Professionals due to its significant threat profile.

**Note:** NIJ certification applies to single curve full coat plates.

# FRAGMENTATION MITIGATION

## ENCAPSALOC™ FRAGMENTATION MITIGATION COATING

With the right precautions, steel core body armor is a safe and effective means of protection. Fragmentation aka "Spall" can be dealt with by using a full coat of our proprietary Encapsaloc™ fragmentation mitigation coating.

## SPALL CONTAINMENT SLEEVE

Spartan Armor Systems® Spall Containment Sleeves provide an extra layer of protection from fragmentation (spalling) and a high degree of confidence when wearing our Base Coat or Full Coat Spartan™ Omega™ AR500 and AR550 Steel Core body armor plates. These spall containment sleeves will reduce or potentially eliminate spalling as projectiles ricochet off the AR Plate, effectively containing such fragments within layers of ballistic rated Aramid Fibers and the rugged 1000D Cordura Ballistic Nylon Casing.

Scan me with any  
smartphone camera app  
for more product info.

# **CERAMIC AND COMPOSITE**

## **LEVEL IIIA - IV BODY ARMOR**

In addition to advances in our line of steel core armor, Spartan Armor Systems® is constantly designing and developing new ceramic body armor technologies. Specifically, we have expanded our offerings of UHMWPE and Ceramic body armor to provide enhanced ballistic threat protection at a lower weight per plate. This allows increased mobility without sacrificing protection from rifle threats.

# FLEX FUSED CORE™

## LEVEL IIIA BODY ARMOR

Comfortable and easy to conceal, our Flex Fused Core™ soft body armor has quickly become one of our most popular products. We manufacture each panel in Tucson, AZ with the utmost attention to quality. Flex Fused Core™ is a very versatile armor that can be worn in a plate carrier or discreetly placed in a bag such as a backpack. At just 1.15 lb and only .35" thick, Flex-Fused Core™ is the perfect option when bulkier and more rigid plates just aren't practical.

# WRAPAROUND LEVEL IIIA

## TACTICAL VEST - EXPANDABLE

- Constructed of durable 1000 denier
- Modular system with the capability to accommodate additional accessories
- Front and Back Pockets  
(will hold our 10"x12" Steel Core Plates or Composite/Ceramic Plates)
- Shoulder straps are fully adjustable
- Side closure cummerbund
- Heavy-duty drag handle
- Front and Back ID attachment platforms measuring 10.5" x 3"

Our Wraparound Tactical Vest provides the operator with flexibility in a quality built platform, made in U.S.A. Each Tactical Vest comes standard with NIJ level IIIA certified front and back soft armor panels, however the additional chambers in the front and back of the vest can be utilized for drop-in armor such as steel core plates or ceramic plates. This allows the operator to quickly adapt to advanced ballistic threats.

# WRAPAROUND LEVEL IIIA

## CONCEALABLE VEST

- Side opening design
- Moisture-wicking, anti-microbial inner liner (this draws moisture away from the body for a faster cool-down time)
- Shoulder straps are fully adjustable
- 5"x8" Trauma Plate (meant to reduce back face deformation)
- Dual 6"x8" and 7"x9" front plate inserts
- Low-profile loop for less bulkiness and reduced friction against clothing

We understand that a standard plate carrier setup might not be ideal for all situations. Designed for discreet and comfortable threat protection, our Wraparound Concealment Vests provide NIJ certified level IIIA threat protection in a low-profile form factor. Each vest is quality built in the U.S.A. using materials designed for extended duty use.

# GHOST SHIRT

IIIA ARMOR **CONCEALMENT SHIRT**

Whether you're out on the street, at work, school, etc. there are increasingly fewer opportunities to protect yourself. The Ghost Concealment Shirt and our Flex Fused Core™ IIIA soft armor provides protection against handgun threats up to .44 Magnum SJHP and .357 SIG FMJ. For maximum ballistic coverage, we include two 10"x12" front and back panels as well as two 5"x7" side panels with each order. Made of a breathable lightweight fabric similar to an athletic jersey, the Ghost Concealment Shirt is designed to be comfortable even when worn for long periods of time. When it's time to wash the shirt, it's as simple as removing the IIIA soft armor panels and placing the Ghost Concealment Shirt in your washing machine and it is machine dryable as well.

# GHOST SHIRT

## IIIA ARMOR CONCEALMENT SHIRT

Low profile design minimizes printing when worn under loose clothing

Made of breathable materials designed to stay cool

Available in S, M, L, XL and XXL

Holds 10"x12" front/back armor panels and 5"x7" side panels

Machine washable  
(use delicate/low cycles)

Flex Fused Core™ IIIA Soft Armor provides .44 MAG SJHP and .357 SIG FMJ protection

Flex Fused Core™ IIIA Soft Armor is made in USA, manufactured in Tucson, AZ

Available in black, black & grey and black with black/grey camo

Spartan Armor Systems® Logo

Spartan Armor Systems® has had a lot of customers ask for combination threat level IIIA plates. What is a combination threat level plate? A combination threat level plate is a plate that is stab-resistant as well as bullet-resistant. The plates have a multi curvature to conform to the body for improved comfort. Our Spartan Armis Level IIIA Plates are coated/encapsulated with Spartan Armor Systems® proprietary "Encapsaloc" Polyurea Coating.

# ELAPHROS LIGHT WEIGHT

## LEVEL III BODY ARMOR

- Stand-Alone Armor System
- Plate Size: 10" x 12"
- Only 3.5 lbs per plate
- Ultra High Molecular Weight Polyethylene [UHMWPE] Hybrid Fibers
- Neutrally buoyant
- Multi-Shot Rated
- 1.2" profile
- Proprietary "Encapsaloc" Polyurea Coating
- Multi-Curve Ergonomic Design
- Stab Resistant
- Raised and Embedded 3D Spartan Armor Systems® Logo

In Greek, Elaphros translates to "light, quick, agile and easy to bear". Elaphros body armor is so light it floats! Weighing just 3.5 lbs per plate, Elaphros body armor provides the operator with a significant mobility advantage when compared to traditional body armor that typically weighs twice as much. Each Elaphros plate is constructed of UHMWPE and coated with our proprietary Encapsaloc™ fragmentation mitigation coating. Elaphros body armor is NIJ certified under NIJ 0101.06 level III specifications.

# HERCULES

## CERAMIC BODY ARMOR

As with our other body armor models, Spartan Armor Systems® level IV ceramic body armor is manufactured exclusively in our state of the art facility in Tucson, AZ. While most manufacturers choose to outsource the production of ceramic body armor, we brought production in-house to meet our superior quality standards and low lead times. From the materials we use, to the packaging of our ceramic plates, quality is at the forefront of our manufacturing and fulfillment processes. Spartan Armor Systems® is proud to provide ceramic body armor that rises to higher standards than other plates on the market, but at competitive prices.

# HERCULES LITE RF2

LEVEL III+/RF2 **BODY ARMOR**

Material Composition: Ceramic & UHMWPE

Plate Size: 9.5"x12.5"

Protection Area: 9.5"x12.5"

Weight: 4 lbs

Thickness: 1"

Curve Profile: Multi Curve

Cut: Shooters Cut

Armor Type: Stand Alone

Exterior: 1000D Condura® with Embroidered Logo

Rated for M80 BALL and M855

The Hercules Lite offers balanced protection and performance in a standalone plate. As a level III+/RF2 rated armor plate, the Hercules Lite is engineered to stop M80 BALL as well as advanced non-armor piercing threats, namely M855. The Hercules Lite provides full edge-to-edge coverage in a SAPI medium 9.5"x12.5" design, weighing in at just 4lbs per plate!

## THREAT PROFILE

# HERCULES

## LEVEL IV BODY ARMOR

Material Composition: Ceramic & UHMWPE  
Plate Size: 10"x12"  
Protection Area: 10"x12"  
Weight: 6.9 lbs  
Thickness: 1.1"  
Curve Profile: Advanced Compound Curve  
Cut: Shooters Cut  
Armor Type: Stand Alone  
Exterior: 1000D Condura® with Embroidered Logo  
NIJ Certification Pending, ETA FEB. 2023

The Hercules level IV body armor plate is manufactured in-house at the Spartan Armor Systems® facility in Tucson, AZ utilizing ballistic ceramic and UHMWPE materials. As with all body armor manufactured by Spartan Armor Systems®, the Hercules level IV ceramic body armor plate has been independently tested and verified by an NIJ Certified laboratory. Each Hercules level IV body armor plate is rated to stop armor piercing rifle rounds up to .30-06 M2 AP. Weighing in at just 6.9 lbs per plate, the Hercules is noticeably lighter than most level IV ceramic body armor plates available. With full edge-to-edge 10"x12" coverage and Advanced Compound Curve design, the Hercules is ideal for operators in need of maximum protection and comfort.

# HERCULES XTREME

MULTI-HIT CERAMIC LEVEL IV

Rated for 3-4 Shots of .30-06 M2AP  
Material Composition: Boron Carbide Ceramic  
& UHMWPE  
Plate Size: 9.5"x12.5" ESAPI  
Protection Area: 9.5"x12.5"  
Weight: 6.1 lbs  
Thickness: 1.2"  
Curve Profile: Multi Curve  
Cut: ESAPI Medium (Shooters Cut)  
Armor Type: Stand Alone  
Exterior: 1000D Cordura® with  
Embroidered Logo

The Hercules Xtreme level IV ceramic body armor plate is our toughest and lightest level IV plate yet. With a boron carbide strike face and UHMWPE backer, the Ares is a military grade plate that has been laboratory tested and proven to defeat 3-4 impacts of .30-06 M2AP armor piercing rounds. Boron carbide is one of the hardest materials known to man. However, it's lighter than other softer ceramics such as aluminum oxide, which is used in most civilian grade body armor. The Hercules Xtreme is a superior level IV plate that is proudly manufactured in our Tucson, AZ facility.

Spartan Armor Systems® has been proudly serving and working with First Responders for years. We have paid close attention to the unique needs of Police, Fire, EMS, and Security Professionals. As such, we've learned what armor and plate carrier features are most sought after by those who serve and protect. Employing this knowledge, Spartan Armor Systems® has developed and produced the Tactical Response Kit to meet their needs, and the needs of everyday citizens seeking the same scope of protection, when it comes to frequently traveling with their threat protection kit. The Tactical Response Kit is an excellent grab-and-go personal protection solution that can easily be stowed in a vehicle, locker, desk...you name it.

Based on our widely popular Sentinel plate carrier design, the Sentinel High Mobility plate carrier provides all the same great features, just in a alternative form factor. The swimmers cut design allows greater range of motion in the shoulders and a lighter weight per plate when compared to the shooters cut body armor platform. Despite the more aggressive taper of swimmers cut plates, the design still provides protection for vital organs.

# LEGION XL

## PLATE CARRIER

Scan me with any

- Durable Emergency Drag Handle
- Anti-Slip Shoulder Padding with Velcro®
- Side Release Buckles on Internal Waist Strap
- Padded Mesh Separators for Better Ventilation
- Accepts 11"x14" Front and Back Plates
- Removable Cummerbund with Side Plate Pockets for 6"x6" and 6"x8" Side Plate Armor
- Velcro® ID Panels on Front and Back
- 1000 Denier Construction
- Available in Black, Coyote Brown, Spartan Green, Gunmetal Grey and Multicam
- Adjustable from 2XL to 4XL

The Spartan Armor Systems® Legion XL plate carrier is rugged, reliable, and fully adjustable from 2XL-4XL. Designed to hold our 11"x14" body armor plates, the Legion XL provides vital organ coverage for larger body types. Born of numerous customer inquiries and feedback, we developed the Legion XL plate carrier to be adjustable from a 2XL-4XL size. The Legion XL weighs in at approximately 3lbs. 9oz., will hold our Steel Core AR500 Omega and AR550 11"x14" body armor plates, while also offering the option to add in 6"x6" or 6"x8" side plates. If you don't want to run the Sentinel Legion XL with the cummerbund - no sweat! The cummerbund is easily removable so you can run your plate carrier with just the front and back plates or the full set-up with side plates.

# SPARTAN

## HIGH MOBILITY **PLATE CARRIER**

Light Weight Plate Carrier

Designed for Our Steel Core Armor Plates

Available in Shooters Cut and Swimmers Cut

PALS Webbing on Front and Back for Versatility

Velcro® Front and Back ID Panels

Accepts 10"x12" Shooters Cut Plates

Cummerbund Accepts 6"x6" Side Plates

Shoulder Pads Included

860 Denier Construction

Reinforced Drag Handle

Available in Black, Coyote Brown, OD Green, Wolf Grey and MultiCam

Adjustable from M to XL

The Spartan plate carrier is perfect for those looking for a clean and simple design at a budget friendly price. However, the Spartan carrier still allows the possibility of expansion by utilizing the surrounding molle webbing as points of attachment. With over 500 five-star customer reviews, the Spartan carrier is one of our most popular products.

The Hydra Plate Carrier is a highly adaptable carrier ideal for quick deployment and emergency situations such as active shooter scenarios. Easily adjustable buckles ensure a snug and comfortable fit on the sides. Ample length shoulder straps allow the Hydra plate carrier to be easily adjusted to fit a wide variety of body types. Breathable mesh is used at chest, back and shoulder contact points to allow for maximum breathability. The Hydra plate carrier is a great choice for anyone looking for a lightweight and versatile body armor configuration.

# ***SPARTAN DL***

## **CONCEALMENT**

# AR500

## REACTIVE STEEL TARGETS

Steel targets provide near instant auditory feedback to the shooter, allowing for faster development of muscle memory. Our line of AR500 reactive steel targets provide the added benefit of simultaneously building the shooter's target acquisition skills.

# FIRST RESPONSE

## FIRST AID KIT

- 1 - SWAT-T Tourniquet, Black
- 1 - CAT Tourniquet, Black
- 2 - Compressed Z Fold Gauze
- 1 - Survival Rescue Blanket
- 1 - Hyfin Vent Compact Chest Seal Twin Pack
- 1 - Naso Airway 28fr with lube
- 1 - TCCC Card
- 1 - Sharpie Marker
- 1 - Clip LED Light
- 2 - Nitrile Glove Pair, Large
- 1 - 1/2 x 2.5yds Waterproof Tape
- 1 - Bleeding Control Instruction Card
- 1 - TSA Compliant 5.5" Shears, Orange Handle
- 1 - Rip Away Pouch, Red & Black
- 1 - Spartan Armor Systems® Medic Patch

Don't get caught unprepared with limited supplies, the First Response med kit was designed for field treatment of injuries that exceed the capabilities of a traditional IFAK/AFAK. In a crisis or emergency situation, it's very likely you may encounter either multiple injured or a person who has sustained multiple injuries. That's why our First Response med kit contains extra supplies such as tourniquets, gauze and gloves.

Additionally, we have included a clip-on LED lights to allow effective temporary field treatment of wounds in low-light and no-light situations. This kit is contained in a high quality rip-away pouch allowing for secure MOLLE attachment and quick detachment in an emergency situation.

# STOP THE BLEED

## FIRST AID KIT

- 1 - CAT Tourniquet, Black
- 2 - Compressed Z Fold Gauze
- 1 - Survival Rescue Blanket
- 1 - Sharpie Marker
- 1 - Nitrile Glove Pair, Large
- 1 - ½" x 2.5yds Waterproof Tape
- 1 - 4" Emergency Pressure Dressing
- 1 - TSA Compliant 5.5" Shears, Orange Handle
- 1 - Bleeding Control Instruction Insert
- 1 - Vacuum Seal Bag

Stop the Bleed® is a national campaign that encourages bystanders to become trained, equipped, and empowered to help in a bleeding emergency before professional help arrives. In accordance with approved Stop The Bleed® criteria, our med kit provides all the medical supplies necessary to field treat traumatic bleeding. As with all our med kits, the Stop The Bleed® kit is designed to buy time to get the patient to professional medical staff for definitive treatment. This kit is contained within a vacuum seal bag measuring 5-inches by 10-inches.

# EVERY DAY CARRY

## FIRST AID KIT

- 1 - SWAT-T Tourniquet, Black
- 1 - Compressed Z Fold Gauze
- 1 - Survival Rescue Blanket
- 1 - TSA Compliant 5.5" Shears, Hi-Vis Orange Handle
- 1 - 4" x 6.75" Carry Pouch with MOLLE and Belt Attachment Points, Black
- 1 - LED Clip-On Light

Stopping traumatic bleeding requires the necessary medical supplies, but it's not realistic to have a first aid kit handy at all times. Our pocket-sized EDC med kit provides life-saving medical supplies in a compact format. Measuring only 4-inches by 6.75-inches, the EDC med kit is a versatile solution with multiple options for carry including MOLLE attachment, belt attachment (multi-directional) or stuff it in a pocket. For low-light and no-light situations, this kit includes a clip-on LED light to allow you to put light where you need it while keeping your hands free. The EDC med kit provides the essential gear to mitigate traumatic bleeding and hypothermia. Includes TSA compliant shears with Hi-Vis orange handle.
